"This is a very low priority part of the trip, and I can't predict when I'll be able to get on the air (limitations of being in the city with poor view to sky, etc.). But I am going to try at least a few passes one way or another! My station will be very simple--FT-817, Elk antenna, and a hand mic. Working half-duplex on the SSB birds will be very challenging for me! I am spoiled by fully automated station operations."

The Braveheart will sail around the north cape of New Zealand's north island, across the Tasman Sea, across the Great Australian Bight, and up the west coast of

Australia to the port of Fremantle. Additional provisions will be taken aboard in Australia and the vessel will be re-fueled for the voyage to Amsterdam Island and back.

FT5ZM team members will begin arriving in Fremantle on January 9th. There will be team meetings, toasts, and shopping trips. Our good VK6 friends have acquired some additional supplies for us and we will take these aboard. The team will board the Braveheart on January 14th, configure our maritime mobile station, and sail for Amsterdam Island on January 15th.

You will likely hear from us one more time before we leave our respective countries and fly to Australia. However, as always, thank you to the amateur and DX community for your support and interest. Visit our website frequently for late breaking news and updates. We've not yet reached our financial goals, but with your continued support, that goal is in sight.
